To Whom It May Concern

It is with great pleasure that Dreams for Kids announces its association with TechCeFaCos NGO Cameroon to host a 'Holiday for Hope' celebration in Cameroon. Holiday for Hope began in Chicago, Illinois, on December 24th 1989 in the United States. Since that time, groups in over 50 countries around the world have joined to host their own celebration of hope for the children in the most need in their community. This collective outreach has inspired thousands of kids and reminded them that their lives have meaning and that their future can be bright and full of promise.

We are extremely excited and inspired that Cameroon has joined the world's celebration through the efforts of TechCeFaCos NGO Cameroon. 'Dreams for Kids' will be sharing the photos and videos of all participants on their website and through extensive social networking channels. We will remind the world that if each of us does our part, and all of us join together, we can make a difference and we can inspire and empower a generation of youth.

Dreams for Kids hopes to use this opportunity to further connect our organizations programs with the youth of Cameroon. It is our vision to unite youth from the United States with youth in every part of the world, so that they may begin to share culture and understanding, build projects which benefit their communities, and help each other bring transformation and shared prosperity to the world.

We welcome TechCeFaCos NGO Cameroon and the youth of Cameroon to our collective effort to make a difference!

With gratitude,

Tom Tuohy

President and Founder
